MANAGEMENT PROCESS

Clinical practice involves maintaining lot of data – Medical, Financial and Administrative. For any busy practitioner, streamlining the workflow and effective data management are extremely vital for smooth functioning of the clinic. Furthermore, not just the amount of data but even its type varies from doctor to doctor. Hence, the need for a system which not only aids in effective clinic management but also allows customization as per the doctors individual needs.

It facilitates users in understanding all statistics regarding patients, fixing appointments, taking care of insurance related affairs, generating reports, and preparing bills.
